

**Operating Instruction
Chapter 3.2.1 - 3.2.6 Safety**

We as MAN Diesel & Turbo would like to keep you up to date concerning safety recommendations while operating your engines as well as during maintenance work.

Hereby we like to ask for your attention concerning the chapter 3.2. SAFETY from our operating instruction. The chapter might not yet be part of the instruction books which have been delivered to you with the engine documentation. Therefore we ask you to take notice about our safety instruction regarding dealing with the engine in operation and taking necessary care while being present in the engine room.

Kindly forward attached document on board, insert it in your on board documentation and discuss it with your chief engineer and engine room personnel.

Please pay special attention to the safety distances around the main engines while personnel are working in the engine room and engines are in operation. Our safety instruction shall support you and your staff preventing a risk to life and health in the right way.

**Action Code:
At first opportunity**

**Update of Safety
Documentation**
