# PrimeServ Spare Part Kits

Safe and efficient overhauls

With a comprehensive range of seals, piston rings and cylinder heads/injector gaskets, MAN PrimeServ offers a broad range of spare part kits for two and four-stroke engines containing all necessary parts in convenient packages. Routine overhauls have never been easier.

PrimeServ has had an excellent market response to the recently introduced spare part kits. The kits are rationally and attractively packaged, and comprise all the parts specific to a given service or repair job. They aim at both simplifying the customer's ordering tasks and ensuring that the components essential to a job are not omitted from an order.

All spare part kits are compact and easily stored aboard, with individual packaging seals to keep the different parts grouped together and to ensure integrity.

Spare part kits also simplify the task of ordering new parts. Simply state the relevant IMO number and en-

gine number, and MAN PrimeServ will immediately identify and dispatch the spare part kit you need.

## Benefits

- Simplified part management
- Seals, rings and gaskets in convenient packages for your overhaul
- Spare part kits eliminate the time spent looking for individual numbers, and let you concentrate on the job in hand
- Simplify your overhaul by replacing all seals/rings/gaskets simultaneously instead of individually at different times.

Spare part kits are currently available for a broad range of two and four-stroke engines, and MAN Diesel & Turbo will continue to expand the concept.

To find out more about spare part kits and the full range of possibilities, contact MAN PrimeServ at:
